MATHEMATICS (MATH)

The Mathematics Program:
1. Provides challenging experiences in Mathematics, Physics, and Physical Science, which prepare graduates to pursue additional study in graduate, medical/dental, and other professional schools.
2. Provides opportunities for all students to develop quantitative and problem-solving skills.
3. Provides experiences that enable graduates to find employment in science-related careers.
4. Provides opportunities for majors to complete a cooperative education experience in their disciplines.

Objectives
1. To improve critical thinking and problem-solving skills of all students.
2. To prepare department majors for medical/dental, graduate, and professional schools.
3. To provide quality general education courses that produce students with skills required for successful careers.

Specific Competencies/Skills
1. Knowledge of the major concepts in Physics, Physical Science, and Mathematics.
2. Proficiency in scientific writing, oral and visual presentations, and computer applications.
3. Proficiency in data analysis and statistical procedures.
4. Application of research techniques.
5. Proficiency in using equipment and technology in areas of the major field

Requirements for a Bachelor of Arts Degree in Mathematics (35 hours)

Requirements for a Bachelor of Science Degree in Mathematics

1. The required courses for a Bachelor of Arts degree
2. Eight (8) hours of Physics PHYS 2425* and PHYS 2426
3. Four (4) additional hours from CHEM 1411*, BIOL 1410*, or BIOL 1411*
4. Two (2) course selected from:
   - MATH 2305 Discrete Mathematics
   - MATH 1342 Introduction to Statistics
   - COSC 1312 Programming Foundations I and
   - COSC 1323 Programming Foundations II

Requirements for a Minor in Mathematics (20 hours)

1. MATH 2413 Calculus I and MATH 2414 Calculus II
2. An additional 12 semester hours selected from MATH 1342, MATH 2415, MATH 3333, and MATH 2318.

Students transferring from another University, please reference division requirements listed under the Department of Natural Sciences.

^ Required course for the Bachelors of Science Degree

COURSES IN MATHEMATICS (MATH)

**MATH 0330 Introduction to Algebra** 3 Credit Hours
The required competencies for successful completion of this course require demonstration of MATH 0330 competencies related to real numbers, linear equations, inequalities, and factoring polynomials. Students must pass this course with a grade of “C” or better to enroll in MATH 1314.

**Offered:** Fall/Spring Yearly
MATH 0330Q  Introduction to Algebra with Review  3 Credit Hours
This is a five-day per week intensive course combining review of basic math skills with MATH 0330 content. The basic math concepts reviewed include operations of whole numbers, fractions and decimals, ratios and percents, rounding, prime numbers, factors and least common multiples. The required competencies for successful completion of this course require demonstration of MATH 0330 competencies related to real numbers, linear equations, inequalities, and factoring polynomials. Students must pass this course with a grade of “C” or better to enroll in MATH 1314.
Offered: Fall/Spring Yearly

MATH 1314  College Algebra  3 Credit Hours
Successful completion of this course requires demonstration of MATH 1314 competencies related to operations on algebraic expressions, functions, linear equations, inequalities, factoring polynomials and logarithms.
Prerequisite: Entrance Exam Placement or C or better in MATH 0330 or MATH 0330Q
Offered: Fall/Spring Yearly

MATH 1314Q  College Algebra with Review  3 Credit Hours
This is a five day per week intensive course combining review of MATH 0330 concepts with MATH 1314 content. The introduction to algebra concepts reviewed includes real numbers, linear equations, inequalities, and factoring polynomials. Successful completion of this course requires demonstration of MATH 1314 competencies related to operations on algebraic expressions, functions, linear equations, inequalities, factoring polynomials and logarithms.
Prerequisite: Entrance Exam Placement or C or better in MATH 0330 or MATH 0330Q
Offered: Fall/Spring Yearly

MATH 1316  Algebra and Trigonometry for Science Majors  3 Credit Hours
This course includes the study of exponents and radicals, graphs of equations, linear and quadratic equations, factoring, trigonometry functions and graphs, application of right and oblique triangles, fundamental identities, composite angle formulas, and inverse trigonometry functions. This course satisfies the General Studies requirement.
Prerequisite: Entrance Exam Placement or MATH 1314
Offered: Fall/Yearly

MATH 1342  Introductory Statistics  3 Credit Hours
This is a first course in statistics that requires knowledge of the fundamental procedures for data organization and analysis. Topics include frequency distributions, graphing, measures of central tendency, dispersion, positions, binomial distribution, normal curves, probability calculation, t-test, chi-square, F-test, hypothesis testing, and statistical estimation.
Prerequisite: MATH 1314
Offered: Fall/Yearly
### MATH 1348  Geometry 3 Credit Hours
The purpose of this course is to introduce the student to the fundamentals of plane and solid geometry. Desirable in its own right, this foundation is also essential for the study of higher mathematics and exceedingly helpful in everyday life. Topics are: axioms, angle measurement, proofs, constructions, perpendicular lines and planes, parallel lines and planes, ratio, proportion, similarity, area and volume.  
**Prerequisite: MATH 1314**  
**Offered: As Needed**

### MATH 1350  Fundamental Concepts of Math for Elementary Education I 3 Credit Hours
A mathematics course which covers the Texas Essential Knowledge and Skills (TEKS) objectives and the TExES objectives for grades EC-4. Emphasis will be placed on standards of the National Council of Teachers of Mathematics (NCTM). Topics include number systems, number systems, non-decimal number bases, algorithms, measurement, whole number algorithms, number theory, fractions, decimals and percents. These topics will be computer solutions to many problems using student designed programs and given programs; real vector spaces, subspaces, bases, dimensions of vector spaces, and spanning sets; eigenvalues, eigenvectors, and linear transformations.  
**Prerequisite: MATH 1314**  
**Offered: Fall As Needed**

### MATH 1351  Fundamental Concepts of Mathematics for Elementary Education II 3 Credit Hours
A mathematics course which covers TEKS objectives and the TExES objectives for grades K-4. Emphasis will be placed on standards of the NCTM. Topics include rational numbers, real numbers, functions, graphs, statistics, probability, geometric shapes, measurement, geometry using congruence and similarity, coordinate geometry, and geometry using transformations. Technology (multi-media carts) will be used throughout the course including computers and graphing calculators.  
**Prerequisite: Field Experience and MATH 1350**  
**Offered: Spring As Needed**

### MATH 1360  Fundamental Concepts of Math for Secondary Schools 3 Credit Hours
A survey of topics in secondary school mathematics, include geometry, linear programming, history of mathematics, graphing calculator, and computer applications in mathematics.  
**Prerequisite: MATH 1314**  
**Offered: As Needed**

### MATH 2305  Discrete Mathematics 3 Credit Hours
A required course for computer science majors. This course covers selected mathematical concepts that facilitate a deeper understanding of computer science and programming. It introduces number systems and computer arithmetic. Topics and concepts include sets, group codes, logic and truth table, Boolean algebra and its application to computer logic design, relations, and functions. Other topics covered include elementary matrix operations, permutations, combinations, and counting techniques.  
**Prerequisite: MATH 1314**  
**Offered: Spring/Yearly**

</tbody>
</table>
MATH 2417  Advanced Calculus       3 Credit Hours
Topics covered in this course include Vector-valued functions and their analysis, the geometry of Euclidean n-space, partial derivatives, functions of several variables, Taylor’s theorem, infinite sequences and series, line and surface integral, LaGrange multipliers, multiple integrals, Green’s and Stoke’s theorems.
Prerequisite: MATH 2415       Offered: As Needed

MATH 3331  Modern Algebra       3 Credit Hours
This course in abstract algebra utilizes the postulational approach. Topics considered include binary operations, mappings, number theory, rings, subrings, groups, subgroups, and fields.
Prerequisite: MATH 1314       Offered: Fall As Needed

MATH 3332  Complex Analysis       3 Credit Hours
A first course in complex analysis covering complex numbers, analytic functions, contour integration, power series, analytic continuation, sequences of analytic functions, conformal mapping of simply connected regions, and related topics.
Prerequisite: MATH 2415       Offered: Spring As Needed

MATH 3333  Probability       3 Credit Hours
A second course in statistics for students majoring in mathematics and sciences. The following topics are covered in this course: Discrete and continuous Probability functions, binomial, Poisson, normal, geometric, and gamma distribution, random variables, joint density, conditional densities, expected values, estimations, hypothesis testing, goodness-of-fit tests, and regression.
Prerequisite: MATH 1342 and MATH 2414       Offered: Spring As Needed

MATH 3334  General Topology       3 Credit hours
Topics include introduction to sets, relations, openness, closedness, convergence, continuity, compactness, connectedness and fixed points in topological spaces with special emphasis on Euclidean spaces and metric spaces.
Prerequisite: MATH 1314       Offered: As Needed

MATH 3335  Numerical Analysis       3 Credit Hours
This course covers polynomial forms and interpolation, divided differences, polynomial, uniform, least-squares and splines approximation; orthogonal polynomials; numerical differentiation; integration; splines; B-splines; and numerical methods for solving initial and boundary value problems for ordinary differential equations.
Prerequisites: MATH 2415, 2318       Offered: Spring As Needed

MATH 3336  Numerical Techniques for Computer Science Majors       3 Credit Hours
This course emphasizes the use of computers in solving problems in applied mathematics. Topics include number presentation; errors in computer arithmetic, portability issues, error classification, well conditioned and ill-conditioned problems and iterative approximation to mathematical problems.
Prerequisites: MATH 2414 and 6 COSC Language Credits       Offered: Spring/Yearly
MATH 3337  Real Analysis  
3 Credit Hours  
Topics covered in this course include: real numbers, upper and bounds, intervals, mathematical induction, sequences and series, convergence, limits, continuity, derivatives, and integrals.  
Prerequisite: MATH 2414  
Offered: Fall As Needed  

MATH 3338  Special Topics in Mathematics  
3 Credit Hours  
This course will cover selected topics in mathematics of special interest to students or instructors. They may be a more in-depth treatment of survey courses or cover a specialty in mathematics. Possible topics include: Actuarial Science, Laplace Transforms, complex variables, calculus of variation, integral equations, and advanced differential equations.  
Prerequisite: Instructor approval  
Offered: Spring As Needed  

MATH 3398:  Number Theory  
3 Credit Hours  
Number theory is the study of properties of numbers in particular the integers and rational numbers. Questions in elementary number theory include divisibility properties of integers (e.g. the Euclidean algorithm), properties of primes (e.g. there are infinitely many), congruences, quadratic reciprocity and integer solutions to basic equations (e.g. Diophantine equations). Even though number theory is one of the oldest disciplines in mathematics, it has recently contributed too many practical problems such as coding theory, cryptography, hashing functions or other tools in modern information technology.  
Prerequisite: MATH 1314  
Offered: As Needed  

MATH 4046  Mathematics Research/Project  
0 Credit Hours  
The student plans and implements an independent mathematical study under the direction of faculty, using facilities available at Huston-Tillotson University or other sites if recommended by the mathematics faculty. Or the student may work with a mathematics faculty member in a specific research area. Course may be repeated with instructor approval.  
Prerequisite: Instructor approval  
Offered: Fall/Spring Yearly  

MATH 4146  Mathematics Research/Project  
1 Credit Hour  
The student plans and implements an independent mathematical study under the direction of faculty, using facilities available at Huston-Tillotson University or other sites if recommended by the mathematics faculty. Or the student may work with a mathematics faculty member in a specific research area. Course may be repeated with instructor approval.  
Prerequisite: Instructor approval  
Offered: Fall/Spring Yearly  

MATH 4147  Mathematics Senior Seminar Fall/Spring  
1/1 Credit Hour  
Senior seminar courses are taken by all Mathematics majors. The student attends one discussion hour per week and at least one science seminar participation hour per week. Oral discussion, a written report and presentation on selected topics developed from information gathered from professional journals and reference
books. In some cases laboratory investigations with written reports may be substituted. Specific requirements for the satisfactory completion of this course are outlined in the course syllabi for each semester.

**Prerequisite:** Senior Standing  
**Offered:** Fall/Spring Yearly

**MATH 4246 Mathematics Research/Project**  
2 Credit Hours  
The student plans and implements an independent mathematical study under the direction of faculty, using facilities available at Huston-Tillotson University or other sites if recommended by the mathematics faculty. Or the student may work with a mathematics faculty member in a specific research area. Course may be repeated with instructor approval.

**Prerequisite:** Instructor approval  
**Offered:** Fall/Spring Yearly

**MATH 4345 Mathematics Internship**  
3 Credit Hours  
This course is an internship experience for majors in Mathematics. Students work as interns in a mathematics-related industry.

**Prerequisites:** 12 Math Major Credits and Advisor Approval  
**Offered:** Fall/Spring Yearly

**MATH 4346 Mathematics Research/Project**  
3 Credit Hours  
The student plans and implements an independent mathematical study under the direction of faculty, using facilities available at Huston-Tillotson University or other sites if recommended by the mathematics faculty. Or the student may work with a mathematics faculty member in a specific research area. Course may be repeated with instructor approval.

**Prerequisite:** Instructor approval  
**Offered:** Fall/Spring Yearly

**MATH 4446 Mathematics Research/Project**  
4 Credit Hours  
The student plans and implements an independent mathematical study under the direction of faculty, using facilities available at Huston-Tillotson University or other sites if recommended by the mathematics faculty. Or the student may work with a mathematics faculty member in a specific research area. Course may be repeated with instructor approval.

**Prerequisite:** Instructor approval  
**Offered:** Fall/Spring Yearly
